

Data Visualization Assignment – 2023

How Visualization was used in a specific research project

This assignment is aimed at the presentation and discussion in class of an example illustrating how Visualization can be used in some field of Engineering.

The work will be performed by groups of students who will all participate in the presentation and discussion.

It may be based on a dissertation, report, paper, book, or a collection of several references, and should provide a 10 minutes presentation understandable by everyone in the audience.

A Power point template is available in Moodle, as well as an example; the final presentation file should have a name according to the given rules and be uploaded in Moodle (until March, 5).

Schedule:

Session 2 – Introduction to the assignment

Session 3 – Team and subject selection

Session 4 - Follow up session

Session 7/8 – Presentation and discussion – March, 6/March 9; submission March, 5th
